

CONFLUENCE

Confluence transforms water into a **metaphor for reception**: a force that gently **receives, carries and guides** each guest into the life of the hotel. Inspired by the molecular shape of water, where one oxygen atom bonds with two hydrogen atoms, as an *elemental expression of distinct parts united through connection*. **Each arrival sets a new ripple into motion**, joining an individual journey to a wider relationship held together through shared experience. Through this continuous flow, the rug embodies reception itself, placing every guest within a larger story of **belonging, renewal, and shared life**.

CONFLUENCE

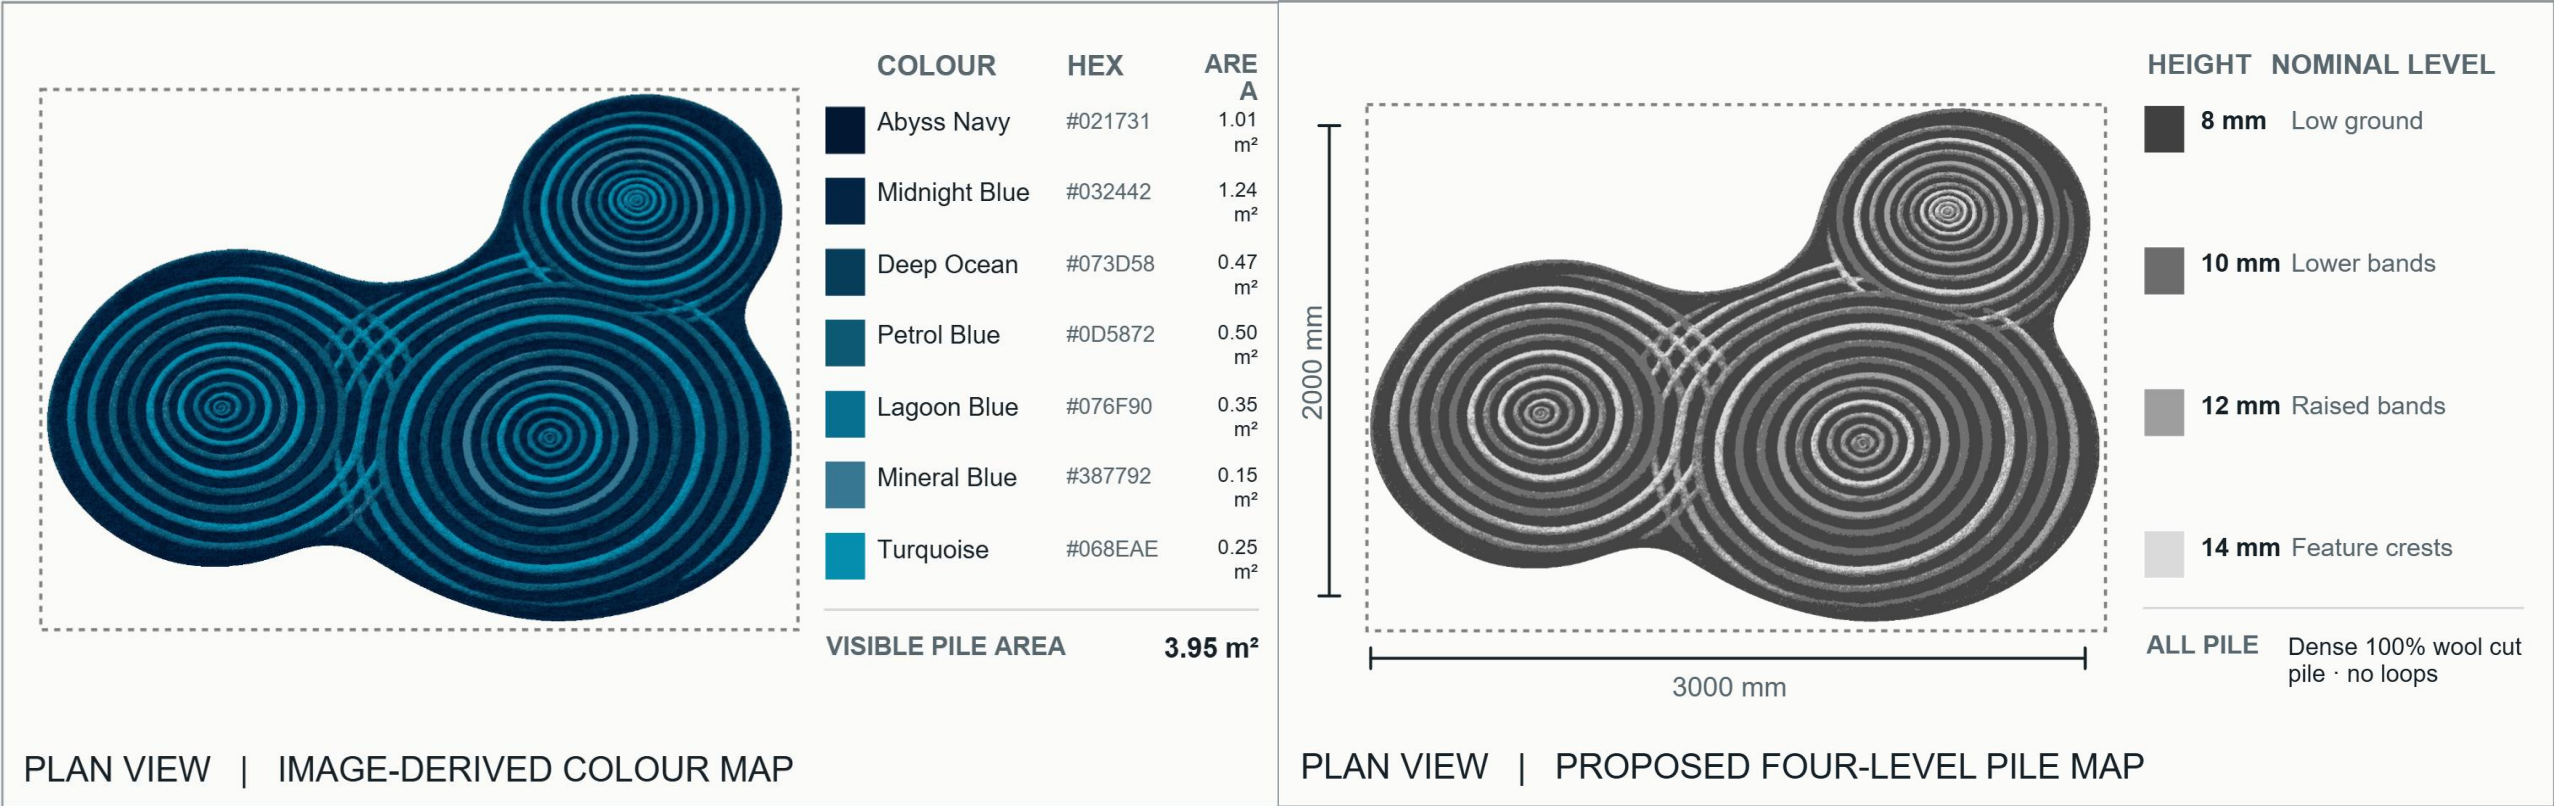

Beyond a point of arrival, the reception lobby becomes a central threshold that **draws guests into connection** with both the space and one another. The concept traces water from the **protective waters of the womb** to the **rivers and oceans that sustain and unite the world**, establishing it as a universal source of life, movement and renewal. As individual ripples meet and overlap, each arrival contributes to the **living energy of the lobby**.

CONFLUENCE

Confluence captures the instant three ripples meet on a water surface. Each lobe forms around an independent ripple center; concentric bands expand, overlap and compress where their fields intersect. Deep navy grounds the form, while teal, turquoise and mineral-blue bands translate wave interference into a **tactile, balanced composition**.

DESIGN REF		FACE FIBRE	100% wool
OVERALL SIZE	3000 × 2000 mm	CONSTRUCTION	Four-level sheared cut pile
SHAPE	Asymmetrical tri-lobed	PILE HEIGHT	8 / 10 / 12 / 14 mm
PILE AREA	≈ 3.95 m²	EST. WEIGHT	20–24 kg
PRODUCTION	South Africa	EDGE FINISH	Sculpted organic edge
