THE GEODE

Hidden Beauty Revealed

The Geode draws inspiration from the hidden beauty of geodes and crystal formations, reinterpreting their layered mineral structures into a sculptural rug composition. Rich blues are paired with warm neutral tones to create an elegant palette that reflects the depth and natural beauty of agate and quartz. Soft flowing contours are balanced with bold geometric forms, creating a cohesive central piece that celebrates the contrast between organic movement and crystalline precision. Varying pile heights, layered borders, and tactile textures enhance the sense of depth, while the combination of geometric facets, contour-like agate patterns, and fan-inspired detailing transforms the rug into a sophisticated statement piece that embodies both nature and contemporary design.
